

THE STATE OF MINDANAOAN CROSS-PROVINCIAL BUS TRANSPORT

Absence of a queue system leading to **physical chaos** to secure a ride home.

The physically disadvantaged such as the **elderly and children get left behind.**

Commuters have to wait in an **inefficient environment** where **even being early does not guarantee a seat.**

In Davao alone, numbers may surge up to

50,000-80,000 commuters per day

during peak seasons such as holidays.

Wrestling a crowd has become the norm.

Proposed Tech Solution:

BUSSIN': the hassle-free queue alternative

Select bus route and schedule

Book a digital ticket and choose payment option

No more worries of missed trips or queue jumpers
